

Before performing step 8, read the Caution.

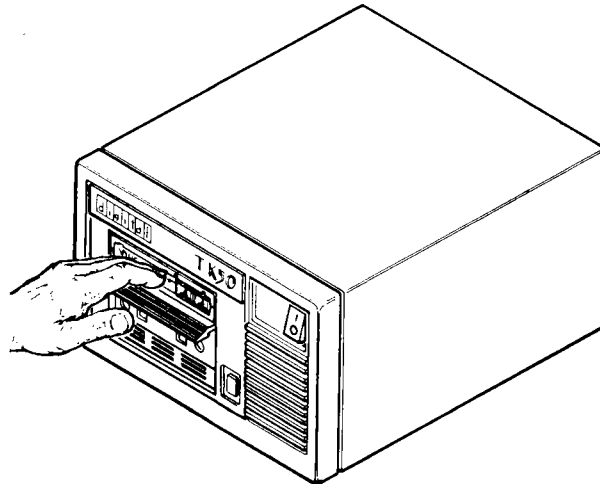

8. Smoothly and completely insert the tape cartridge.

Hold the tape cartridge with the arrow on top, pointing away from you. Make sure the label is facing you. Place the cartridge partially into the drive as shown in the first part of the figure below. Push the cartridge (as shown in the second part of the figure) into the drive, smoothly and firmly, until it locks in place inside the drive. Now the red light turns on and the green light goes off.

CAUTION: You will feel some resistance as you push the cartridge into place. It is very important NOT TO STOP AT THIS POINT, BUT TO CONTINUE TO PUSH THE CARTRIDGE FIRMLY UNTIL IT LOCKS IN PLACE.
