1/s Susceptability Test

ABSTRACT

This test verifies that the cores of a Y axis address strings of the selected memory test zone are not sensitive to 0 read noise propagated along the address string. Scope loop options are provided to facilitate any additional diagnostic procedures that may be used in conjunction with this test.

REQUIREMENTS

PDP-11

STORAGE = 200 = 2656

LOADING = Absolute Loader

EXECUTION TIME = 1 min. = Bell will ring

STARTING PROCEDURE = 200 with automatic test limits = up to 28K
= 202 with selected test limits

PRINTOUTS = Yes

SWITCH REGISTER OPTIONS = Yes

SW15 = HALT ON ERROR
SW14 = SCOPE LOOP
SW13 = INHIBIT PRINTOUT
SW12 = HALT ON END OF PROGRAM
