K273 RETENTIVE MEMORY
(DOUBLE THICKNESS MODULE)

This module has three magnetically latched relays to retain vital information in the event of unscheduled loss of system power. This module uses the OK Level from the K731 source module to cut off relay coil drive, if shutdown is imminent; it restores drive after full voltage reappears.

Per Module	Three Mercury Relays
Fanout	15
Slow Connection	B → D
Slowed Point	D
OK Level Input	E

K273 — \$72.00
