

MODULE EXTENDER TYPE W980

**W
SERIES**

The W980 Module Extender allows access to the module circuits without breaking connections between the module and mounting panel wiring.

**W
SERIES**

SYSTEM MODULE ADAPTER TYPE W985

The W985 is an adapter which permits DEC system modules to be plugged into a FLIP CHIP mounting panel. It requires a block of four (two high and two wide) FLIP CHIP module spaces. The pin connections are made in two vertical slots with all pins being used on the upper connector and only pins S, T, U, and V being used on the lower connector. The two connectors on the component side of the module (to the left as you face the wiring) must be left vacant to accommodate the extra width of the system module. Built on a W991 board.

W980 — \$14.00
W985 — \$34.00
